May, 1965.

*To the Chairman and Members of the  
Urban District Council of Rothwell.*

MR. CHAIRMAN AND GENTLEMEN,

I have pleasure in presenting my fourth Annual Report on the Health and Sanitary Circumstances of Rothwell. It covers the year 1964.

The Vital Statistics of the Urban District are satisfactory and are considered in detail on pages 4 - 8. There is an excess of Births over Deaths and those standards which provide a true index of the health of any place, e.g. infantile and maternal mortality are maintained.

Particulars of Infectious Disease which occurred during the year are described on page 17. A large number of cases of Measles was recorded, the disease being generally mild in nature.

When the extensive epidemic of Typhoid Fever occurred in Aberdeen in June, a systematic check was undertaken in the town in order to protect the inhabitants against suspect tins of corned beef which were incriminated in the outbreak.

Mr. A. Smith, Surveyor and Public Health Inspector, has contributed that portion of the Report which is included in Sections C, D and E.

Dr. J. V. L. Farquhar, Medical Referee of the Kettering Crematorium has kindly supplied the figures relating to cremations.

I am grateful to the Chairman and Members of the Public Health Committee for the assistance which they are always ready to provide, to Mr. Smith for his willing and pleasant co-operation and to my Secretary, Miss Langley, for her painstaking work in the preparation of this Report.

I have the honour to be,

Your obedient Servant,

F. R. N. LYNCH,

*Medical Officer of Health.*

# SUMMARY OF VITAL STATISTICS

COMPARATIVE STATISTICS FOR THE FIVE YEAR PERIOD  
1960 TO 1964

	1960	1961	1962	1963	1964
Area of the Urban District (acres)	3,638	3,638	3,638	3,638	3,638

Totals					31	22	53

## COMMENTS ON VITAL STATISTICS

1. **Population.**—The Registrar General's mid-year estimate of population is 4,750; this is 10 less than the figure for 1963.
  
2. **Births.**—There were 64 births during 1964, that is 7 more than in the previous year. This gives a crude birth rate of 13.47 per 1,000 population. This rate, standardised for the age and sex composition of the population, gives an adjusted rate of 16.71. The adjusted, or corrected birth rate is obtained by multiplying the crude rate by a number known as the Comparability Factor, this latter figure being supplied by the Registrar General. The Factor for Rothwell is 1.24. The adjusted birth rate of 16.71 for 1964 compares with the rate of 14.85 for 1963 and the provisional crude rate for England and Wales 18.4 per 1,000 population.
  
3. **Deaths.**—There were 53 deaths from all causes in 1964, that is 16 less than in 1963, giving a crude death rate of 11.16 per 1,000 population. The Comparability Factor 0.89 gives an adjusted rate of 9.93. The provisional crude death rate for England and Wales is 11.3.
  
4. **Disposal of the Dead.**—Of the 53 deaths during the year, 34 bodies were cremated at Kettering Crematorium. The percentage is 64.15.
  
5. **Infantile Mortality.**—There was one death under one year of age giving an Infant Mortality rate of 15.63. In 1963 there was also one Infant Death. I append the details. There were no Neonatal Deaths, a Neonatal Death being a death occurring within the first month of life. The corresponding Infant Mortality Rate for England & Wales is 20.0 and the Neonatal Mortality Rate 13.8.

<i>Age</i>	<i>Sex</i>	<i>Cause of Death</i>
1 month	M	Acute Bronchitis. Erysipelas of Buttock. P.M. No inquest.

6. **Still Births.**—There was one Still Birth in 1964, giving a rate of 15.38 per 1,000 Live and Still Births. The rate for England & Wales is 16.3. There was also one Still Birth in 1963.

<i>Sex</i>	<i>Cause of Death</i>
F	Cause unknown.

7. **Maternal Mortality.**—There were no deaths classed to Pregnancy and Childbirth.

## SECTION B.

### General Provision of Health Services

In subsequent sections, full details will be found relating to infectious diseases and environmental health within the Urban District, for which services the Council are directly responsible.

The present section is related to those health services which concern more the personal health and welfare of the individual rather than public health and the community. The Health Committee of the Northamptonshire County Council is responsible for the administration of many of these services under Part III of the National Health Service Act.

Liaison between County Council services and District Council services is facilitated by the fact that your Medical Officer of Health is also a School Medical Officer and Assistant County Medical Officer.

**Laboratory Facilities.**—The Public Health Laboratory, Northampton and the Department of Pathology at Kettering General Hospital are available for the examination of specimens in connection with the diagnosis and control of infectious diseases.

Seven bacteriological examinations of faeces and one of Pork for Dysenteric or Enteric organisms were done at Kettering General Hospital during the year and all proved negative.

**Ambulance Service.**—This is one of the services for which the County Council is responsible. The assistance which the St. John Ambulance Brigade has previously given in this work has been discontinued during the year.

**Domiciliary Services.**—These include District Nurses, Midwives and Health Visitors, who are all highly trained, qualified nurses on the staff of the County Medical Officer. The Home Help Service, also provided by the County Council, is proving more and more valuable in relieving people of domestic worries during periods of illness or confinement, and in helping old folks to remain in their own homes, so that they can retain their treasured independence.

**Child Welfare Centre.**—A clinic is held on the first and third Wednesday in every month at The Labour Hall. A Medical Officer attends both sessions. In accordance with the policy of the County Health Department, a new type of clinic, which provides facilities for the teaching of parentcraft and relaxation to expectant mothers, is held on each Tuesday afternoon at 2 p.m. in the Crown Hall, High Street.

Welfare Foods, (National Dried Milk, Cod Liver Oil, Orange Juice etc.) are distributed at Messrs. Grays, (Chemist), 2 Market Place, during shop hours.

**Immunisation and Vaccination.**—Immunisation against Diphtheria, Whooping Cough and Poliomyelitis and vaccination against

Smallpox are free services, available either from the family doctor or at the County Child Welfare Clinics. Certain age groups of children can also be given B.C.G. vaccination to protect against Tuberculosis; this is done through the School Health Service.

**Treatment Centres and Clinics.—**

(a) TUBERCULOSIS.—New Patients—Outpatient Department,  
General Hospital, Kettering.

Follow-up Clinic—St. Mary's Hospital,  
Kettering.

(b) VENEREAL DISEASES.—Out-patient Department,  
General Hospital, Kettering.

Clinics are held weekly and treatment is provided by the Oxford Regional Hospital Board.

**Tuberculosis and Other Diseases of the Chest Committee.—**

The excellent work of this Committee was continued during the year and a number of visits were made to patients undergoing both hospital and domiciliary treatment. In 1964, the sum of £200 was spent on assistance to patients; this sum included £53 for Cash and Clothing Grants, etc., and the cost of supplying 3,630 pints of milk. There are 13 patients on the Committee's visiting list.

**Rothwell Citizens' Welfare Committee.—**This Committee was formed in March 1962 for the surveillance of the aged people of the town. Its members include Urban Councillors, representatives from various Church and voluntary organisations, Ministers of Religion and Medical Practitioners.

The objects of the Committee are to assist old people, whether resident in the town at present or accommodated in local hospitals, caring for the aged and chronic sick.

With the help of the W.V.S., the Chiropody Clinic has been held successfully once a month and the Committee has been able to expand the work of the Clinic to a small extent.

The Committee subsidises the meals provided by the 'Meals on Wheels Service' and gives financial assistance towards the maintenance and garaging of the delivery van.

The needs of the old people in Rothwell are being met on an increasing scale and the requirements of the chronic sick and disabled have not been neglected. At Christmas every home where there was an occupier over 70 years of age was visited and gifts of cash and kind were distributed. Visits to hospitals were also made where residents of the town were provided with appropriate Yuletide comforts.

**Women's Voluntary Service for Civil Defence.—**Much good work was carried out during the year by the W.V.S. The 'Meals on Wheels Service' was responsible for the delivery of a large number of hot meals. The total number of meals delivered was 2,724.

In addition, gifts of clothing and knitted blankets were made to the elderly people and the W.V.S. van has been used for the conveyance of patients to various clinics.

**National Assistance Act, 1948, Section 47.**—This Act empowers Local Authorities to require the compulsory admission to hospital in certain cases of persons in need of care and attention. No formal action was taken under the provisions of the Act during the year but it was found necessary to remove two elderly persons to hospital without actually invoking the Act. One of these has since died.

REPORT BY

A. SMITH

M.P.H.I.A., M.R.S.H., CERT. S.I.B., Cert. Meat and Foods, R.S.H.  
Surveyor and Public Health Inspector.

I have the honour to present my Annual Report for the year 1964.

## SECTION C.

### Sanitary Circumstances of the Area.

**Water Supply.**—An adequate supply of water has been maintained in the town by the Mid-Northamptonshire Water Board, and no reports of water shortage were received during the year, although there still appears to be a lack of pressure in certain parts of the town.

**Water Analysis.**—The following information was supplied by the Engineer and Manager of the Mid-Northamptonshire Water Board:

“The following samples of water were taken during 1964 by the Board:—

	<i>Bacteriological Examination</i>					
Rothwell ... ..	...	...	...	...	...	24

The results of all these analyses were satisfactory.

A copy of a report upon the chemical and bacteriological analyses of the final water at Pitsford was submitted.—

“The results indicate a pure and wholesome water suitable for public supply purposes”.

**Fluoride Content of the Water Supply.**—The water supply contains 0.3 parts of naturally occurring Fluorine per million parts of water.

**Rainfall.**—The recorded rainfall during 1964, taken at Clover Hill Reservoir, Kettering was 17.54 inches, 3.81 inches less than the 21.35 inches last year. This is one of the lowest recorded annual rainfalls.

1964	17.54						
1963	21.35	1959	19.73	1955	19.55	1951	29.97
1962	18.69	1958	28.44	1954	29.06	1950	25.58
1961	22.12	1957	23.72	1953	19.24	1949	23.72
1960	33.49	1956	23.25	1952	23.44	1948	28.77

**Water Services.**—New services were connected to 3 new private houses, 8 new Council houses and 18 existing Private houses.

**Sewerage and Sewage Disposal.**—There have been no serious defects or stoppages of sewers throughout the system during the year.

The reconstruction and modernisation of the Sewage Works has continued, and at the end of the year was nearing completion. This should give an improved sewage treatment when finally in full operation.

**Public Cleansing.**—A weekly collection of house and trade refuse has been maintained excepting for holiday periods.

**Controlled Tipping.**—All household refuse is deposited in the Controlled Tip at Thorpe Underwood, and facilities are available for tradesmen to deposit their trade waste in the tip at moderate charges.

**Salvage Collections.**—The total collections of mixed waste paper was 56 tons, 9 cwts., 1 qr., an increase of 8 cwts., 2 qrs. over 1963.

The price of all waste papers was increased and restrictions of deliveries were removed during the year.

Total receipts from the sale of mixed waste paper was £453 against £434 in 1963.

**Annual Tonnage of Waste Paper:—**

<i>Year</i>					<i>tons</i>	<i>cwts.</i>	<i>qrs.</i>
1952	...	...	...	...	48	11	0
1953	...	...	...	...	56	9	0
1954	...	...	...	...	65	16	0
1955	...	...	...	...	72	5	0
1956	...	...	...	...	70	0	2
1957	...	...	...	...	70	6	0
1958	...	...	...	...	69	13	2
1959	...	...	...	...	78	11	3
1960	...	...	...	...	66	5	2
1961	...	...	...	...	69	16	2
1962	...	...	...	...	68	12	2
1963	...	...	...	...	56	1	3
1964	...	...	...	...	56	9	1

**Rodent Control.**—45 infestations of rats were successfully dealt with by your Rodent Operator during the year, when 148 bodies were recovered, mostly at the refuse disposal tip and sewage works.

Sewer treatment was carried out by baiting 14 manholes on different parts of the system, but no evidence of infestation was found.

**Factories Act, 1961.**—There were 23 factories on the Register—10 inspections were made and no defects were found. The number of outworkers living in Rothwell in August, 1964 was 18, all engaged in Textile works. Regular inspections were made.

Prescribed particulars on the administrations of the Factories Act, 1961 are to be found at the end of the Report.

## SECTION D.

### Public Health and Housing Acts

**Housing.**—Eight new dwellings were completed by the Council during the year, and a start was made on a further two. Three private houses were completed during the year.

20 houses, the subject of Demolition Orders, were demolished.

**Slum Clearance.**—During the nine years 1956-1964, a total of 121 uninhabitable dwellings have been dealt with under the Housing Acts, and 88 families have been re-housed. 32 bungalows and 18 ground floor flats have been made available for Old and Disabled Persons.

#### Houses Demolished:

The Green ... ..	12
Castle Hill ... ..	1
Spring Gardens ... ..	3
Bridge Street ... ..	2

#### **Number of Notices Served :-**

Informal :	Nuisance	...	...	7
	Housing	...	...	5
Statutory :	...	...	...	—

**Common Lodging Houses.**—There are no common lodging houses in the town.

**Storage of Petroleum Spirit.**—12 licences for the storage of petroleum in underground tanks have been issued during the year.

SECTION E.

Inspection and Supervision of Food

**Meat and Food Inspection.**—There are no licensed slaughter-houses in the District.

The following food was examined and found to be unfit for human consumption, consequently being surrendered and destroyed:—

Tinned Pork	...	...	...	...	6 lbs.
Tinned Ham	...	...	...	...	21 lbs.

**Shops.**—Food Shops were regularly inspected and kept in a highly satisfactory condition.

**Clean Food Campaign.**—Notices continue to be displayed in all food shops requesting shoppers, in the interests of hygiene, not to bring dogs into the premises. These notices appear to be serving their purpose.

## SECTION F.

### Prevalence of, and Control over Infectious Diseases

There was little serious Infectious Disease during the year. It was, however, a Measles year, 273 cases being notified. In addition, 7 cases of Whooping Cough, 3 cases of Scarlet Fever, 1 case of Meningitis, 1 case of Food Poisoning and 1 case of Respiratory Tuberculosis in an elderly person occurred.

**Diphtheria, Whooping Cough and Tetanus.**—Routine immunisation of infants under one year of age with Triple Antigen was continued during the year. Immunisation is carried out either by the family doctor or at the County Health Department's bimonthly clinics at the Labour Hall.

**Whooping Cough.**—Seven cases were recorded during the year.

**Measles.**—As stated above, 273 cases of Measles were notified. The last year in which any sizeable number was reported was in 1960. The cases reported this year tended to be mild in character and there were no fatalities.

**Gastro-Intestinal Diseases.**—No cases of Bacillary Dysentery were notified. Three suspected cases of Food Poisoning were reported but bacteriological examination was unable to confirm it in any case. One isolated case of a death due to Enteritis Necroticans was recorded by the Coroner.

**Scarlet Fever.**—Three mild cases occurred.

**Infectious Hepatitis.**—No case of this disease was notified in the District during the year.

**Smallpox.**—There were no cases during the year.

**Poliomyelitis.**—This is the fourth disease which is prevented by routine immunisation in infancy. This is again done either by the family doctor or at the County Health Department's Clinics. No cases occurred.

**Tuberculosis.**—One new case of Respiratory Tuberculosis was notified in an elderly person who subsequently died, death being due to a different cause. The Register, as at 31st December, 1964, stands as follows:—

**Public Health (Prevention of Tuberculosis) Regulations, 1925.**—These regulations empower the Council to prevent persons suffering from Tuberculosis to engage in the milk trade. No action was taken during the year.
